IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

Applicant: Schauerte

Examiner: Unknown

Serial No: 09/726,499

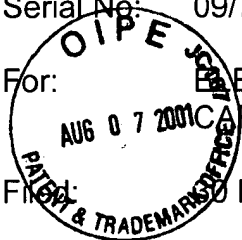

Art Unit: Unknown

For: ELECTRODE FOR INTRAVASCULAR STIMULATION,
CARDIOVERSION AND/OR DEFIBRILLATION

Filed: November 2000

Date: 31 July 2001

Commissioner of Patents and Trademarks
Washington, D.C. 20231

INFORMATION DISCLOSURE STATEMENT

Under 37 CFR 1.97

This Information Disclosure Statement is filed with the missing parts, so it is filed prior to an action on the merits and is timely filed without payment of a fee. 37 CFR §1.97(b).

The filing of this Information Disclosure Statement shall not be construed as a representation that a search has been made (37 CFR §1.56(g)), an admission that the information cited is, or is considered to be, material to patentability or that no other material information exists.

The filing of this Information Disclosure Statement shall not be construed as an admission against interest in any manner. Notice of January 9, 1992, 1135 O.G. 13, at 25.

This Information Disclosure Statement is made to comply with the duty of candor imposed on all individuals associated with the filing or prosecution of this application, as defined by 37 CFR §1.56(c).

Five (5) U.S. patents and two (2) foreign patent documents are listed on the attached one (1) sheet of Form PTO/SB/08A which is made a part hereof. A copy of each is enclosed.

Also enclosed, but not listed on the form, is a copy of a search report from the German Patent Office on German application 199 57 662.9, on which this US application claims priority.

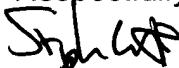

The German search report is in the German language, but it uses the international conventions for citation of prior art, so it is clear from the report that no "novelty" references are made. The references cited in the German search report are listed as AA through AG on the Form PTO/SB/08A. The German search report cites these references as the basis for "obviousness" rejections.

In the specification, particularly at paragraph [0005], a reference is made to US Pat. No. 5,954,761, which issued 21 September 1999. While this reference is not explicitly cited above, the applicant notes that Reference AF is the PCT application filed based on the same US application, that is, Serial No. 08/823,998, filed 25 March 1997. For that reason, no copy of the Machek '761 patent is included, as it would only duplicate Reference AF, which is already in English.

No English language equivalent is known for Reference AG, which originated as a US application in 1992 and has apparently never surfaced as a US patent.

The foregoing Information Disclosure Statement is based upon the information known to the inventor or contained in the undersigned attorney's file as of the filing date of this statement and is inclusive of the best information known to each of the undersigned at that date. Prompt consideration of the Information Disclosure Statement and the references by the Examiner is earnestly requested.

Respectfully submitted,

Stephen L. Grant
